

# At Home Creation Station

## Make a Rainstick

### You will need:

- paper towel roll
- duct tape
- markers, stickers, pieces of paper, and other fun decorations
- ½ cup of rice (or barley, farro, corn, small bird seed, or tiny pasta shapes like orzo )
- aluminum foil

### Directions:

1. Decorate the outside of your tube with markers, stickers, pieces of paper, or whatever decorating items you have on hand.
  2. Cover one end of a paper towel roll with duct tape.
  3. Loosely crumple a thin tube-shaped piece of aluminum foil and insert it inside the center of your paper towel roll.
  4. Fill the inside with about ½ cup of your rice or grain mixture.
  5. Cover the other open end of the paper towel roll with duct tape.
- Now, turn your rainstick up and down and up and down and listen as the "rain" trickles through the stick. Have Fun!
